Subject: Public comment from hearing on CCST report on fracking

Dear Ms. Moore,

I attended the joint Senate-Assembly meeting to present the findings of the CCST report on fracking on Tuesday, August 25, 2015. As requested by the committee members, in the interest of time, I am submitting my public comment via email rather than at the podium.

I believe California can't afford to allow fracking to continue. Not only do we need to leave this oil in the ground to slow the pace of climate change in the future; the CCST report makes it clear that well stimulation and the chemicals used in this process are contaminating our air and our very precious water right now.

I support a complete and ban on fracking in California and I hope Senator Pavley and the rest of the committee members will work toward halting this toxic process quickly.

Thank you,

Laura McCamy
